

In “Where is the friend’s home”, published in *Frontier in Genetics*, 5:400,
<http://journal.frontiersin.org/Journal/10.3389/fgene.2014.00400/full>

Near the end of the first page a typo crept in

“By definition, $F_{st} = \frac{\sum_{s=1}^S}{w_s} (\bar{p}_{f(s)} - \bar{p}_f)^2 \text{var}(g_f) \geq 0$.”

It should read

“By definition, $F_{st} = \frac{\sum_{s=1}^S w_s (\bar{p}_{f(s)} - \bar{p}_f)^2}{\text{var}(g_f)} \geq 0$.”
